

MedicCloud
CORPORATE PROFILE

ABOUT US

We are a leading Australian-owned company specialising in x-ray machine services and IT solutions.

We provide expert support for diagnostic imaging, medical IT infrastructure, and cloud services, ensuring our clients receive top-quality service backed by our extensive certifications.

VISION

To be the premier provider of integrated medical technology and IT solutions, delivering innovation and reliability that enhances healthcare outcomes.

MISSION

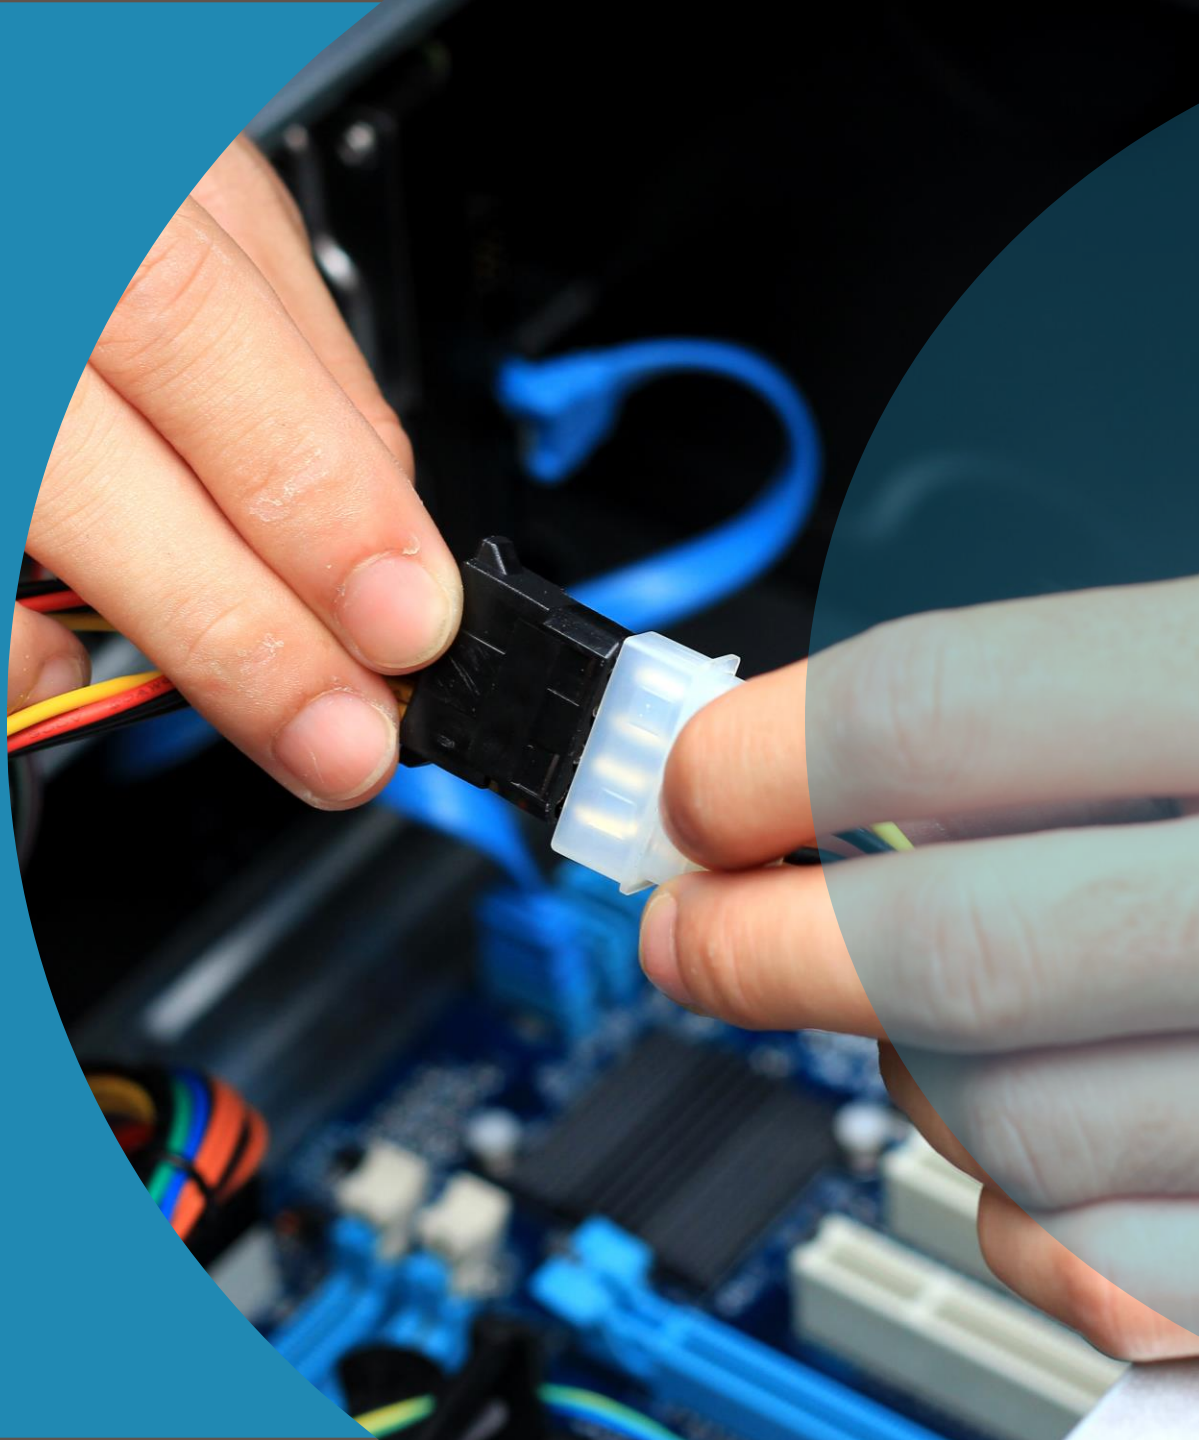

To empower healthcare providers with advanced diagnostic imaging and IT solutions, ensuring efficiency, compliance, and patient safety across Australia.

HISTORY

Founded in 2012, we began with a mission to bridge the gap between medical technology and information technology (IT) services. Over the years, we've grown into a trusted partner for healthcare and veterinary providers nationwide, expanding our services and expertise in diagnostic imaging and IT infrastructure.

PORTFOLIO

Our clients include hospitals, clinics, and veterinary practices across Australia. They rely on us for critical diagnostic imaging services, IT support, and cloud solutions that keep their operations running smoothly and securely.

PARTNERS

We are proud partners with leading technology providers, including Microsoft, DRGEM, Fuji Healthcase, LG Healthcare, Dell, Cisco to name a few, ensuring that our clients receive cutting-edge solutions backed by global expertise.

CERTIFIED

We are fully certified to comply with Australian standards, particularly in diagnostic imaging. We are an approved Radiation Tester with the Department of Health, and our services align with all relevant regulations and best practices.
